

Background of PreXion

PreXion, Inc. is a subsidiary wholly owned by XTrillion, Inc. that specializes in unique and emerging data processors traded as XTrillion®.

The processors are developed focusing on processing volume images extracted from CT and/or ultrasound scanners; therefore, the performance of the processors is one of the most suitable embedded processors for medical scanners in terms of processing speed, accuracy and electricity consumption.

XTrillion began operation in November 2007 as a Japanese corporation spun off from the US company, TeraRecon, Inc.; it dedicates to develop unique and advanced medical equipment. It also has prestigious professional engineering team which understands both medical and IT field.

PreXion, Inc. has established to focus on distributing Dental CBCT scanners branded "PreXion 3D" and Industrial line ups branded "Visionary Systems". Those brands have obtained market recognitions on their advanced performances in practical use.

Company

Business Name	PreXion, Inc.
Established	November 30, 2007
Description of Business	<p>Distributing CT scanners and/or components embedded unique and emerging reconstructing processors traded under XTrillion® in Dental, Medical and Industrial fields.</p> <p>"PreXion 3D CBCT" scanner features powerful reconstruction engines and smart operating software. In the emerging dental market, "PreXion 3D CBCT" has the most sophisticated performance and design suitable for dentist offices.</p> <p>"Visionary Systems" provides precise and detailed 3D images from X-ray scanning. Its technologies come from medical fields, in which detailed research is required.</p>
